

## Making Statistics More Interesting!

*This free CODE Maths Hub and AMSP work group is designed to look at ways of improving A Level Maths teaching*

Many A Level Maths students find the Statistics sections not only boring but difficult; for them it's the least appealing part of Maths—what can we do to change that?

This group will look at the Statistics Syllabus starting from 'Making sampling and basic data analysis less tedious' and work together to develop some practical starters for each topic.

### Who is this Work Group for?

- A Level Maths teachers
- Year 11 Maths teachers

**This session will be from 4-6pm on  
Thursday 28 January 2021**
